

AMERICAN STRONG

OUTRIGGER PADS MADE IN THE USA
AND BUILT TO LAST A LIFETIME

CONSTRUCTION EQUIPMENT, INC.
Bigfoot
OUTRIGGER PADS

STRENGTH | STABILITY | SAFETY

NEW PADS DESIGNED TO

NEW!

SLIDE PAD

Tailor-made for smaller and more mobile equipment in the field, this outrigger pad has a removable stop bar that lets you slide the outrigger pad on the outrigger. Bigfoot's slide pad stays on the equipment after the stop bar is reinstalled & allows the operators to set up multiple times at a job location without losing the pads or having to pick up and set up each time.

NEW!

BOOT STYLE

Built for larger equipment, Bigfoot's new Boot Style pad is custom-designed for each customer's outrigger size specifications. The new open nose style allows material that would build up to escape and it makes it easier for the equipment operator to see his outrigger is properly deployed on the pad.

MEET YOUR UNIQUE NEEDS.

BIG GRIP PAD **NEW!**

Made from Bigfoot's composite material, the Big Grip pad offers additional grip and stability to the job. Use the pad face down and the teeth bite into the surface area of contact providing great stability on ice, snow, mud and other slippery surfaces. When the Big Grip pad is used face up, the teeth bite into cribbing/dunnage or another Big Grip pad faced down to reach the height needed to level the crane or equipment.

NEW!

STOP BAR PAD

The Stop Bar pad is built to make sure the outrigger stays on the outrigger pad. We'll install one to four stop bars per what works best for your needs.

**GUARANTEED
FOR LIFE**

CUSTOM COMPOSITE OUTRIGGER PADS AVAILABLE IN ALL STANDARD SIZES

Bigfoot uses its own custom blend of UHMW that it specially formulated to maximize compressive loads. Made from American materials, our durable composite maintains 1/7th the weight of steel and has been manufactured by Bigfoot since 1995 with zero returns to date. In fact, we believe so strongly in the durability of our composite pads that we guarantee them for life!

We offer many standard & stock outrigger pads from 12X12 @ 1 inch to 60X60 @ 4 inch in half-inch increments in both square and round in either black or safety orange. Need a custom size? No problem! We can make what works best for you!

YOUR JOB SITE STABILITY PARTNER

Bigfoot is an American family business that has 43 years of experience as an end user of outrigger pads and more than 23 years making high-quality wood and composite outrigger pads. This experience has given us the insight needed to create a wide range of strong and reliable stability products you need to get the job done safely. And, if we don't already have the product you need, just ask and we'll employ our expert in-house design and manufacturing team—all of whom are located in Woodstock, IL—to quickly develop a custom solution that works for your needs and can be shipped from our Illinois facility to your location.

TRULY 100% AMERICAN MADE

There are companies that sell you what they have. Bigfoot builds what you need. Our products are all made in our facility in Woodstock, IL by veteran ownership and employees using only the industry's strongest, most durable materials. We are a hard-working team that takes pride in producing dependable, high-quality and customizable outrigger pad solutions that will exceed your expectations.

WOOD OUTRIGGER PADS

Bigfoot is the only major manufacturer of both wood and composite outrigger pads. Our wood pads have been used in the field for decades and have been proven to be durable and dependable.

That's because we use Baltic Birch, a wood that is lighter and more durable than other hardwoods. This premium wood gives our pads a life span of up to 10 years with typical usage.

We make these in 24X24 @ 2 inch to 48X48 @ 4 inch in both square and round. Need a custom size? No problem! We can make what works best for you!

POLE PLATE PULLER

Bigfoot's pole plate puller is made out of our custom composite material that is guaranteed for life. It is designed for cylinder pole pullers to sit on top of to prevent the puller from sinking in the ground.

We make this in 1 inch up to 2.5 inch sizes. Need a custom size? No problem! We can make what works best for you!

COMPOSITE CRIBBING

Engineered for maximum compressive load with load ratings, the composite used to make our cribbing is guaranteed for life with proper use in the field.

Bigfoot offers all standard and stock sizes. Need a custom size? No problem! We can make what works best for you!

WOOD CRIBBING

Our wood cribbing is the strongest in the industry. That's because we use Baltic Birch, a wood that is lighter and more durable than other hardwoods. This premium wood gives our cribbing a life span of up to 10 years of typical usage.

OUTRIGGERPADS.COM

STRENGTH

Bigfoot's custom composite blend has been formulated by Bigfoot Bill for the maximum compressive load ratings. This American material has been OEM tested and approved since 1995 with zero returns. In fact, we believe so strongly in our composite that we guarantee it for life.

STABILITY

We put a lot of research and hard work into creating solutions that maximize the stability of your job. It's why we created our own custom blend of lifetime-guaranteed composite and use premium Baltic Birch for our wood pads.

SAFETY

50% of crane failures—including collapses—are caused by improper outrigger set up. Our outrigger pads have been crafted to provide a safe job site by providing the reliable stability you need on the job.

“

Our crews are really happy with the Big Grip pads! They are pleased with how well they have provided better traction in snow and ice. They absolutely love the high-vis orange and talk about how it really draws your attention to tripping hazards, which is exactly what we were hoping for. Thank you for your help in making our work sites safer!”
